BIOLOGY

Associate of Science

The Associate of Science Degree with a field of study in Biology offers students the opportunity to take a core curriculum of general education courses with an emphasis in Biology.

Many exciting career opportunities are available in the biological sciences. Students should bear in mind that many of the career areas listed require training beyond the Associate of Science degree and some will require a post graduate degree.

- Agriculture
- Biotechnology
- · Dentistry
- · Dietary Research
- · Environmental Science
- · Forensic Science
- · Genetic Engineering
- · Health Sciences
- · Marine Science
- Medicine
- · Medical Research
- · Microbiological Research
- · Molecular Biology
- Pharmacology
- · Physical Therapy
- · Science Education
- Toxicology
- · Veterinary Science
- · Wildlife Biology

Program Learning Outcomes

- The student will apply the scientific method to perform experiments and interpret data.
- The student will demonstrate knowledge of the structure, metabolism, genetics, physiology and molecular processes of cells.
- The student will describe the theory of evolution through natural selection and discuss how it impacts the study of biology.
- The student will apply proper scientific terminology and taxonomy and explain how classification schemes relate to phylogenies.
- 5. The student will describe microbial mechanisms of pathogenicity.
- The student will describe the anatomy and physiology of tissues, organs, and organ systems
- The student will describe the fundamental principles of maintaining homeostasis in organisms.
- 8. The student will be able to describe the interactions among organisms as related to their ecosystem.
- The students will be able to explain the principles of genetic inheritance, apply them to predict outcomes of genetic crosses, and identify inheritance patterns in genetic data.
