

BACTERIAL MENINGITIS

Effective January 1, 2012, Texas Education Code 51.9192 requires all students enrolling at public, private, or independent institutions of higher education to have an initial bacterial meningitis vaccination or booster dose during the five-year period preceding, or at least 10 days prior to, the first day of the first semester. Students affected by the mandate must submit proof of vaccination before the 10th class day to the Enrollment Center.

A student is not required to submit evidence of receiving the vaccination against bacterial meningitis or evidence of receiving a booster dose if:

1. The student is 22 years of age or older by the first day of the start of the semester; or
2. The student is enrolled only in online or other distance education course(s); or
3. The student is enrolled in a continuing education course or program that is less than 360 contact hours, or continuing education corporate training; or
4. The student is enrolled in a dual credit course which is taught at a public or private K-12 facility not located on a higher education institution campus; or
5. The student is incarcerated in a Texas prison.

A recent update to the bacterial meningitis legislation allows students, who will be attending a community college, to submit an exemption for the bacterial meningitis vaccine at <https://www.dshs.texas.gov/immunize/school/exemptions.aspx>.

South Texas College recommends consulting a physician about the need for an immunization against bacterial meningitis to prevent the disease. Meningitis is a very serious, sometimes fatal, disease that is easily spread on college campuses. South Texas College prides itself in providing all of the proper precautions to protect the health and well-being of our students.
